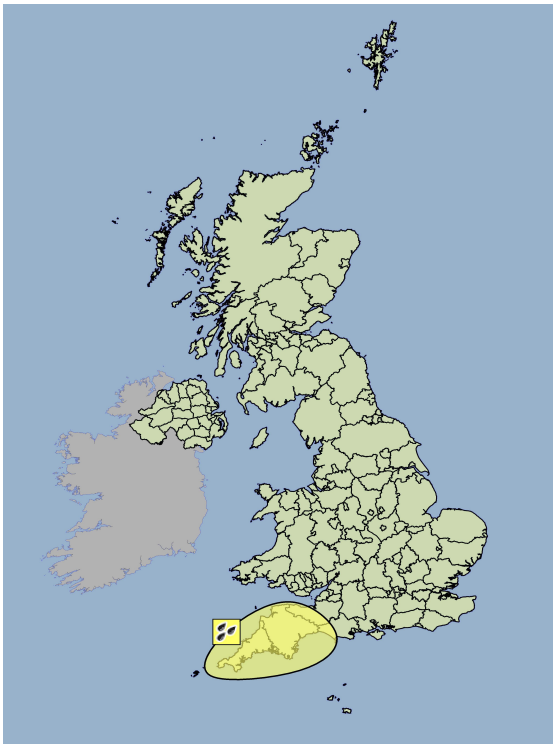
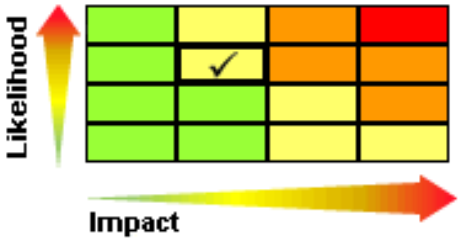
National Severe Weather Warning Service





Chief Forecasters Assessment
A zone of moist, warm air covers the UK at present, and as developments in the Atlantic move northeast, some heavy rain is likely to develop. 30 to 40 mm of rain could fall locally within around 6 hours.

There is some uncertainty surrounding details of this development, with the possibility of updates to the warning.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **04:00 on Mon, 10th Aug 2015** until **13:00 on Mon, 10th Aug 2015**

Areas of heavy rain seem likely to affect parts of southwest England on Monday morning, clearing by early afternoon.

The public should be aware of the possibility of localised surface water flooding, as well as minor disruption to road travel and outdoor activities.
